PROFILE

I am a recent graduate of IT from Shaqlawa Technical College, and I am passionate about working in technology and programming. I am studying Full-Stack Web Developer and trying to understand the basics of databases and systems and how they work. I also like to work in groups in different fields of technology. My first group work was building smart chairs for the disabled at college.

WORK EXPERIENCE

• In 2024

This year I worked on creating reports with using Microsoft Word.

• In 2025

For two months in the Shaqlawa Education Directorate, I worked on systemizing teacher's files, which I converted from physical to electronically.

• In 2026

Creating Lumina Link for personal or company link bio.

EDUCATION

Diploma of Information Technology (IT) (2024 - 2025)
College | Shaqlawa Technical College

Course
I studied at full-stack web developer. (2025 - 2026)

PROJECTS

• Project 1: Amin Portfolio

Project Link: <https://amin-portfolio-iota.vercel.app/>

A modern personal portfolio website showcasing projects, skills, and professional information. Features smooth animations, fully responsive design for all devices, and dedicated sections for project highlights and contact information.

Technologies: React.js, CSS3, HTML5

AI Integration: Utilized AI assistance for content optimization and design refinement.

- **Project 2: Lumina Link**

Project Link: <https://lumina-link.vercel.app/>

An advanced bio link platform with comprehensive customization features: Dark/Light mode toggle, 7 color themes, multi-language support (Kurdish, Arabic, English, Spanish), full RTL implementation, and mobile-first responsive design.

Technologies: React.js, JavaScript (ES6+), CSS3

AI Integration: Leveraged AI for internationalization implementation and UX optimization

- **Project 3: HudaLibrary**

Project Link: <https://huda-library.vercel.app/>

An Islamic digital library management system with advanced search functionality, category-based filtering, detailed book information display, and user-friendly interface for browsing religious texts and resources.

Technologies: React.js, JavaScript, CSS3

AI Integration: Applied AI tools for UI/UX design and feature development
